MICROBE-LIFT/SA is formulated specifically for the removal of organic bottom solids that are slow to degrade.

Works faster at warm water temperatures, however may be used effectively at any temperature year-round.

Recommended for use with all MICROBE-LIFT bacteria and enzyme products.

Years in development, MICROBE-LIFT/SA speeds the biological removal of slow to degrade organic waste matter from aquatic pond bottoms that may become toxic to fish and plant life.

As organic solids accumulate on the pond bottom they begin to break down releasing toxic gasses to the surrounding environment. These gaseous by-products endanger fish, marine life and plants.

MICROBE-LIFT/SA removes bottom organic sludge and muck, reducing or eliminating the potential harmful gaseous compounds, and helps to clarify your pond water at the same time.

MICROBE-LIFT/SA contains natural cellular matter, select biological accelerators and special microbes proven effective in pond sludge reduction.

- ▶ Provides "rapid & natural sludge and muck removal"
- ▶ 80% faster than competitive products
- ▶ Reduces and binds phosphate
- ▶ Helps improve pond clarity
- ▶ 100% active ingredients
- ▶ Disperses quickly
- ▶ Organic and microbial based
- ▶ Bio-degradable

MICROBE-LIFT/SA will not discolor pond water.
